

Operation, maintenance and care

**UNI-JET Tilt-turn fitting** 

Appropriate operation, maintenance and care of windows

ddress / Your maintenance service :	

Advice on operation, default and hazards

In order to avoid damage to your window take note of the following advice :

- Do not put any load on the sash
- Do not turn the sash beyond the predetermined opening angle
- Do not jam the sash by placing an object between sash and frame

In order to prevent accidents be aware of the following hazards :

- Risk of getting crushed between frame and sash
- Risk of falling out of the open window
- Risk of injury by sash swinging open through a gust of wind

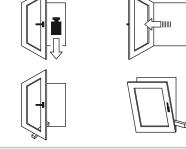

How to operate a tilt-turn window : (meaning of symbols)

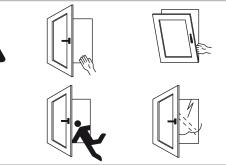

- green: sash closed
- sash in tilt position for blue: airing
- sash in turn position for red: cleaning or inrush airing

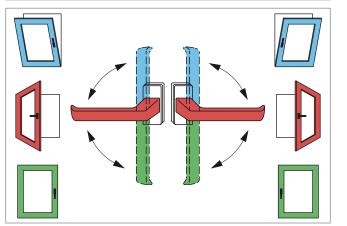

## Attention:

In order to prevent hazards it is necessary that sashes in turn position should be held or secured.

Maintain your window's warranty!

In order to maintain the warranty on the window hardware it is imperative that the advice on operation, default and hazards be

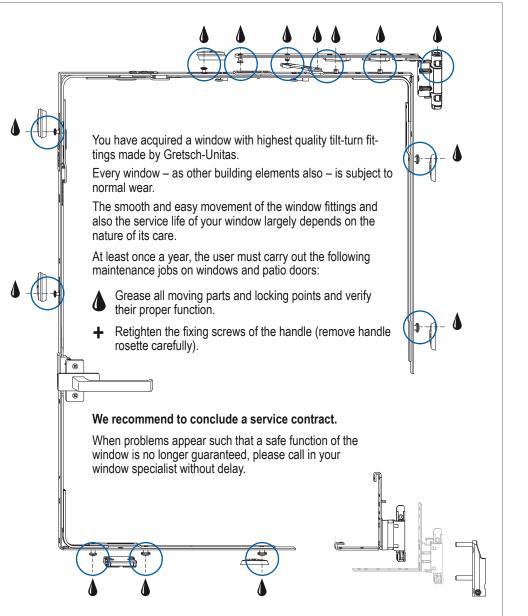

Adhesive label with operating symbols available on request.

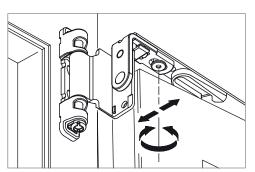

observed.

Gasket pressure adjustment - stay arm

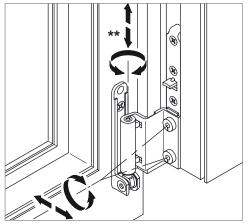

Horizontal sash adjustment - corner bearing

Gasket pressure adjustment – mushroom pin

Horizontal sash adjustment - stay arm

Vertical and gasket pressure adjustment

We recommend that the window finish and glazing be regularly checked over and any damage made good.

The gasket must not be painted over or cleaned with aggressive agents.

If necessary, ask your window fabricator to undertake the adjustments! \*
